OBULASETTY RAKESH ROYAL

LinkedIn: https://www.linkedin.com/in/rakesh-obulasetty/ Email: rakiharsha623@gmail.com
GitHub: https://github.com/rakeshobulasetty123 Mobile: +91-7569564568

SKILLS

Languages: Python, JavaScript, C, C++, Java
Frameworks: HTML, CSS, Scikit-learn (for ML),
Tools: SQL, MS Excel, Power BI, Jupyter Notebook
Relative Coursework: Data Structure and Algorithms, Object Oriented Programming, DBMS
Soft Skills: Agile Mindset, Conflict Resolution, Project Management, Contextual Decision-Making

PROJECTS

Rainfall in India – Exploratory Data Analysis & Visualization | GITHUB Apr '25

- Cleaned and prepared the rainfall dataset using Pandas and NumPy, resolving 100% of missing values and removing duplicates to ensure complete and reliable data for analysis and accurate downstream exploratory workflows
- Conducted exploratory data analysis using Pandas and Seaborn and built six visualizations (distribution plots, correlation heatmaps, boxplots, regional bar charts, and monthly contribution pie charts) to uncover annual, seasonal, and regional rainfall trends and highlight variability and monsoon intensity for clear end-user interpretation

Road Accident Analysis Dashboard – Predictive & Visual Insights | GITHUB Mar '24

- Preprocessed real-world accident data (CSV) by resolving 100% of missing values, normalizing inputs, and encoding labels, improving dataset quality and analytical reliability for modeling and dashboard reporting
- Built and compared ML classification models using RapidMiner and scikit-learn (achieving up to 82% accuracy in accident severity prediction) and developed interactive Power BI dashboards revealing 35% higher peak-hour incidents and hotspot zones, increasing stakeholder insight engagement by 40% and supporting safety-focused decision-making

TRAINING

Centre for Professional Enhancement – Data Analytics Essentials | GITHUB Jun '23 – Aug '23

- Performed data preprocessing and exploratory analysis using Python, SQL, Pandas, and NumPy, standardizing team and venue names across seasons and cleaning 17.4% null or missing records to produce a fully consistent dataset for analysis
- Designed interactive IPL performance dashboards in MS Excel and applied advanced analytics and data transformation to validate, structure, and model match data, visualizing key trends (toss impact, win margins, team comparisons, season performance) to improve reporting accuracy by 15% and enhance decision-support effectiveness by 25%

Wisher Diary — Android Application Development

- Developed, an advanced notepad-style Android app using Kotlin and XML with voice lock security for protected access.
- Implemented content filtering across three categories and enabled structured data retrieval for server- side access and management.

CERTIFICATES

Deloitte – Data Analytics Job Simulation (Forage) | Certificate Aug '25

Tata – GenAI Powered Data Analytics Job Simulation (Forage) | Certificate Aug '25

IBM – Data Visualization with Python (Cognitive Class) | Certificate Jul '25

Certificate of Merit – Data Analytics Essentials (LPU) | Certificate Jul '25

ACHIEVEMENT

HACK-IOT- HACKATHON Participated in the "Binary Blitz" Hackathon, collaborating on real-time problem solving and innovative project development.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology, Computer Science and Engineering: **CGPA: 6.95** Since Aug '23

Narayana Junior College Tirupati, Andhra Pradesh
Intermediate PCM, **Percentage: 95.5%** Aug '20 – Mar '23

Sri Chaitanya School Rayachoti, Andhra Pradesh
Matriculation, **Percentage: 100%** Jun '20 – May '21
